

IT Consulting and Professional Services

Comtech enables businesses and government agencies to successfully complete their projects and enhance their bottom line by offering qualified personnel at competitive rates.

Challenge

Staffing projects with qualified technical experts at the right time and the right place at a competitive price

Solution

Comtech formed an IT Consulting and Professional Services Division to respond to our internal and external customers' needs. Comtech has assembled a core group of staffing and human resources professionals that bring an in depth knowledge of the IT Consulting market with access to highly qualified, hard-to-find experts in their respective fields. We partner with our customers to fully meet their business/mission objectives.

Benefits

- Vetted candidates that fit customer's needs so customers can focus on planning or core business/mission
- Flexible, Just-in-Time Resources that reduce overall project costs
- Comtech handles administrative functions associated with personnel reducing project costs

Customer Challenges

Prime integrators and government agencies need IT Consultants and professionals who understand their mission to complete their projects. This can be a daunting task in an environment of highly competitive procurements and shrinking budgets.

Comtech's Solution

Comtech partners with our Government and other contractors to understand their business needs and then works with them to reduce the administrative burden by screening and hiring qualified candidates to fill those positions. Our employees/consultants integrate into project teams as well as taking on leadership roles. Our involvement continues during the project as we ensure that our staff perform to the satisfaction of our customers. Comtech's management team meets with the customer on a regular basis and they quickly resolve any identified issues even if it requires replacing poor performing staff.

Comtech's IT Consulting and Professional Services Division provides government agencies and contractors with qualified staff to fulfill mission critical requirements. We focus on IT professionals as well as high level consultants to support ERP implementations (e.g. Oracle, SAP, and PeopleSoft), software development utilizing today's dominant technologies (e.g. .NET, Java, J2EE), and IT services. We also provide ancillary services for:

- Desktop Publishing
- Audio/Video Support
- IT Evaluation Support
- Network Transition
- Technical Training
- CAD/CAM, GIS, BIM, EDMS, & SDM
- Document and Video Conversion/Desktop Publishing

Comtech is accustomed to the competitive IT staffing environment to fill positions requiring specialized skills. Comtech competes on a daily basis for hard-to-find resources and has extensive experience in rapidly staffing positions with high quality, carefully screened professionals to meet our own and our customers' needs.

Benefits

Comtech rapidly provides staffing of hard to find skills at competitive rates so our customers can focus on planning and execution of their projects or core business/mission.

As the employer Comtech can manage the administrative functions associated with personnel including screening, background checks, processing clearances, payroll, and performance reviews. This means our customers can focus on completing the projects or their core business/mission comfortable in the knowledge that staffing issues will not hinder performance.

Since the staff we place are Comtech employees or consultants, Comtech reduces customer overhead costs by providing staff compensation and benefits.

Summary

Comtech is able to deliver perfectly timed resources with the required skills to meet our customer's needs. We have a proven track record for rapidly staffing projects with the right resource at the right time.
